E-LEARNING PORTAL FOR SPINAL INJURIES

In order to pilot run the educational resource for an e-learning portal being created by the Education Committee of International Spinal Cord Society (ISCOS) in partnership with Indian Spinal Injuries Centre (ISIC), Livability and Asian Spinal Cord Network (ASCoN), Indian Spinal Injuries Centre & Spinal Cord Society are holding a one of its kind workshop on the Comprehensive Management of Spinal Cord Injuries (SCI). The 3-day event began on April 27. The e-learning portal aims to facilitate dissemination of information on the management of spinal cord injuries amongst medical and paramedical professionals from around the globe and from developing countries like India. Speaking about the workshop and the web portal, Chief of Spine Service & Medical Director and Chairman Education Committee of International Spinal Cord Society Dr HS Chhabra said, "This workshop and the e-learning portal is created to cater to the urgent need of Comprehensive Spinal injury management in developing countries like India which can go a long way in saving a life and helping them get back to a normal life style."
